What the QR??

What is a QR exactly?

Perhaps you have seen one of the above odd looking squares with all sorts of dots and shading and then wondered what it was and what it was used for. These squares are referred to as QR codes, or **Quick Response** codes. Similar to the bar code on your package of cheese at a grocery store that communicates with purchase price into the self scan machine, you can use your smart phone to scan this code to be taken directly to a website or web page.

How Does My Phone Scan this Code?

If you have an Apple or Android phone, you can scan a QR code. You need to open up your camera app and hold your camera over the area above scan me and have the camera facing the Scan Me QR code. As you hold your camera over it, a box will pop up showing the web address and the options for getting to the website. If you click open in the browser it will open the webpage in your preferred browser.

Let's Try It! the QR code will take you to the Fun Bus website at www.funbus.com. We are hoping to add QR codes in the future to our brochure so you will be taken directly to the detailed itinerary for each trip.

Safe Travels,
